

**ManageEngine**   
**AD360**

An integrated solution to simplify  
IAM and IT compliance

The need of the hour:  
A solution that provides  
everything an IT admin  
needs in a central  
console

There are 360 degrees,  
so why stick to one?

A man in a grey suit is pointing towards the camera with his right hand. The background is a blurred server rack in a data center.

How we can help

ManageEngine   
**AD360**

Make things easy and convenient with integration and collaboration. AD360 is integrated with solutions for your every business need.

# Bringing everything together in a single console

Active Directory (AD), Exchange, and Office 365 management

300+ built-in reports on all aspects of AD, Exchange, and Office 365

In-depth auditing and real-time alerts with integrated compliance management

Secure single sign-on (SSO) and password self-service

Automation, delegation, and workflow rules

Back up and restore objects, mailboxes, site collections, and more

# What is AD360?

AD360

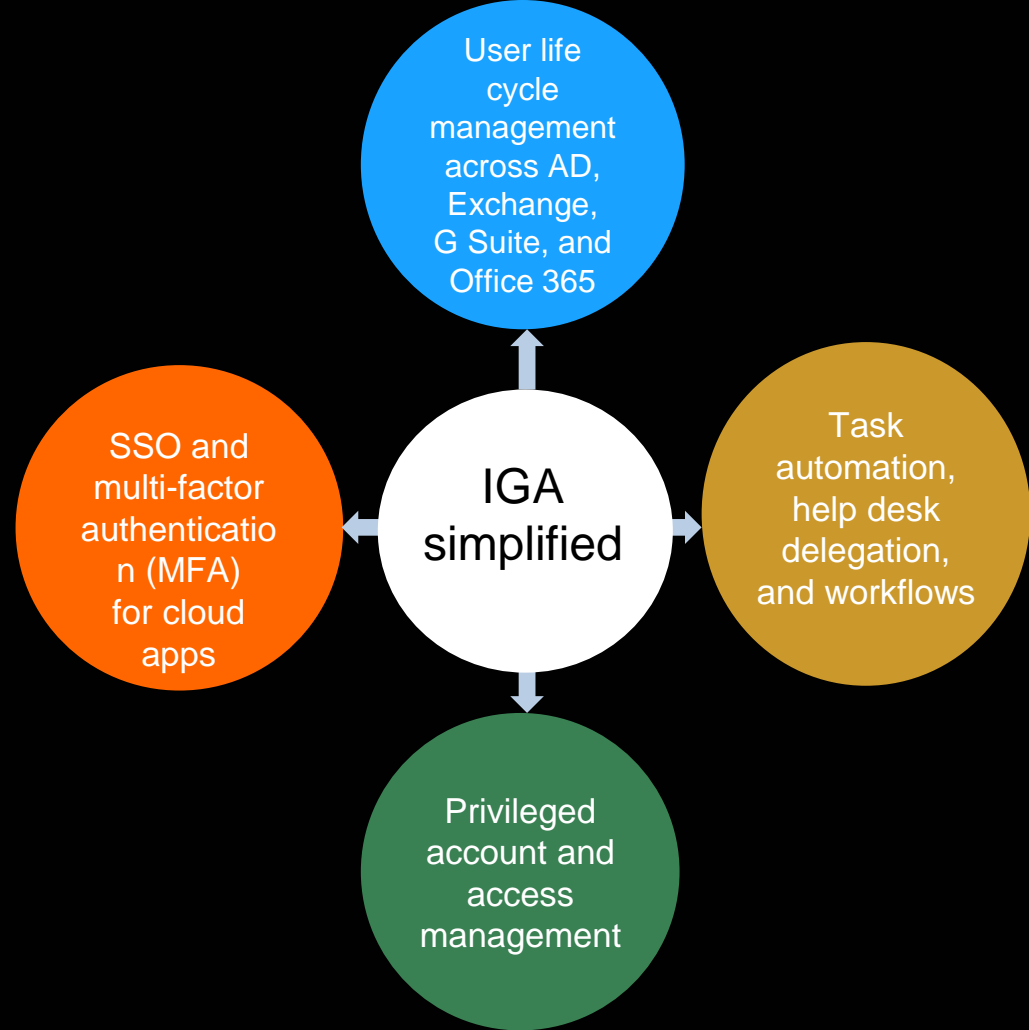

Identity governance  
and administration  
(IGA)

IT compliance  
and security  
management

- An integrated solution that includes:
  - ADManager Plus
  - ADAudit Plus
  - ADSelfService Plus
  - Exchange Reporter Plus
  - O365 Manager Plus
  - RecoveryManager Plus

# How AD360 solves IGA challenges

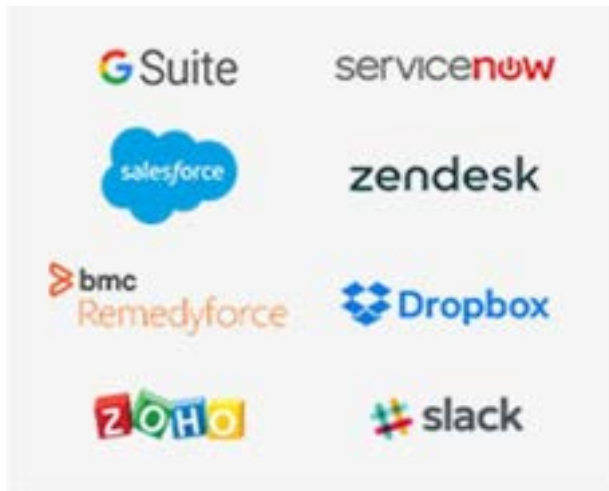

# User life cycle management

- 360° user provisioning: Create accounts for users in AD, Exchange, Office 365, G Suite, and more in one click
- Bulk user creation via CSV import and templates
- User attribute management, group membership management, share permission management, and more

# Secure SSO for cloud apps

SSO for cloud apps

- AD-based SSO for cloud apps
- Enhanced security with stronger password policies
- OU and group-policy-based access control

# Multi-factor authentication

- Fortify access to sensitive resources using MFA for Windows, macOS, and Linux endpoint logons, along with various other applications
- Supports authenticators such as YubiKey, Duo Security, and RSA SecureID
- Ensure users have signed up for the required authenticators by enforcing MFA during enrollment

# Password self-service and password sync

- Perform self-service password resets and unlocks for LDAP accounts
- Self-service actions are protected by MFA
- For Windows, self-service password reset is available from the lock screen (Ctrl+Alt+Del) using the GINA/CP client
- Real-time synchronization of passwords and user account changes across multiple platforms

# Automation, delegation, and approval workflow

- Create users, manage groups, and clean up inactive user accounts completely hands-free using customized templates
- Role-based help desk delegation
- Build a custom workflow structure for controlled automation

# Privileged access management

- Define access controls with the right mix of rigidity and fluidity
- Manage and monitor groups and users with privileged access
- Audit all admin and users activities
- Manage who can access what files, folders, and groups, and when

# The time machine for your every need

- Back up all AD, Exchange, and Office 365 objects, mailboxes, sites, folders, and more in a single click
- Automate backups to run hourly, daily, or weekly
- Restore deleted objects like containers, mailboxes, site collections, and folders as a whole, or perform item-level or attribute-level restoration
- Perform restart-free recovery of all objects

# How AD360 ensures security and IT compliance

# Detects anomalous user authentications with predefined logon/logoff reports

The screenshot displays a security management console interface. The left sidebar contains a navigation menu with categories like 'User Logon Reports', 'Local Logon-Logoff', 'ADFS Auditing', 'Account Management', 'User Management', 'Group Management', 'Computer Management', 'OU Management', and 'GPO Management'. The main content area is titled 'User Logon Activity' and shows a report for the domain 'admanagerplus.com'. The report includes a pie chart showing the distribution of logon events: 36 Success (light blue) and 6 Failure (dark blue). Below the chart is a table with columns for 'USER NAME', 'CLIENT IP ADDRESS', 'CLIENT HOST NAME', 'DOMAIN CONTROLLER', 'LOGON TIME', 'EVENT TYPE', 'FAILURE REASON', 'EVENT CODE', and 'EVENT NUMBER'. The table shows one entry for the user 'Administrator' with a failed logon attempt on Dec 08, 2016 at 03:03:29 AM due to a 'Bad password'.

**User Logon Activity**

Domain: admanagerplus.com

Period: month | Hours: All | Select Objects: Administrator

**User Logon Activity**

36 Success, 6 Failure

USER NAME	CLIENT IP ADDRESS	CLIENT HOST NAME	DOMAIN CONTROLLER	LOGON TIME	EVENT TYPE	FAILURE REASON	EVENT CODE	EVENT NUMBER
Administrator	127.0.0.1	admandemo.admanagerplus.com	admandemo.admanagerplus.com	Dec 08, 2016 03:03:29 AM	Failure	Bad password	16	4771

# High precision user behavior analytics powered by machine learning helps monitor user behaviour and detect anomalies

# Monitor OUs, groups, accounts, and computers with exhaustive reports and real-time alerts

# Contain security incidents quickly by instantly identifying high-risk indicators of compromise, like changes to GPOs or permission and security groups

The screenshot displays a web-based reporting interface for Group Policy Settings Changes. The interface includes a navigation sidebar on the left, a main header with search and filter options, and a central table of change records. The table columns are GPO NAME, MODIFIED TIME, DOMAIN CONTROLLER, MODIFIED BY, SUMMARY, and LINKED GPO'S. The data shows four entries for AD Audit Plus policies, each with a summary of actions like 'Added', 'Removed', and 'Modified'.

GPO NAME	MODIFIED TIME	DOMAIN CONTROLLER	MODIFIED BY	SUMMARY	LINKED GPO'S

# Easily pass compliance audits with out-of-the-box reports

- Get reports designed to help you prove compliance
- Keep compliance reports archived for as long as you want

How does  
AD360 stand out?

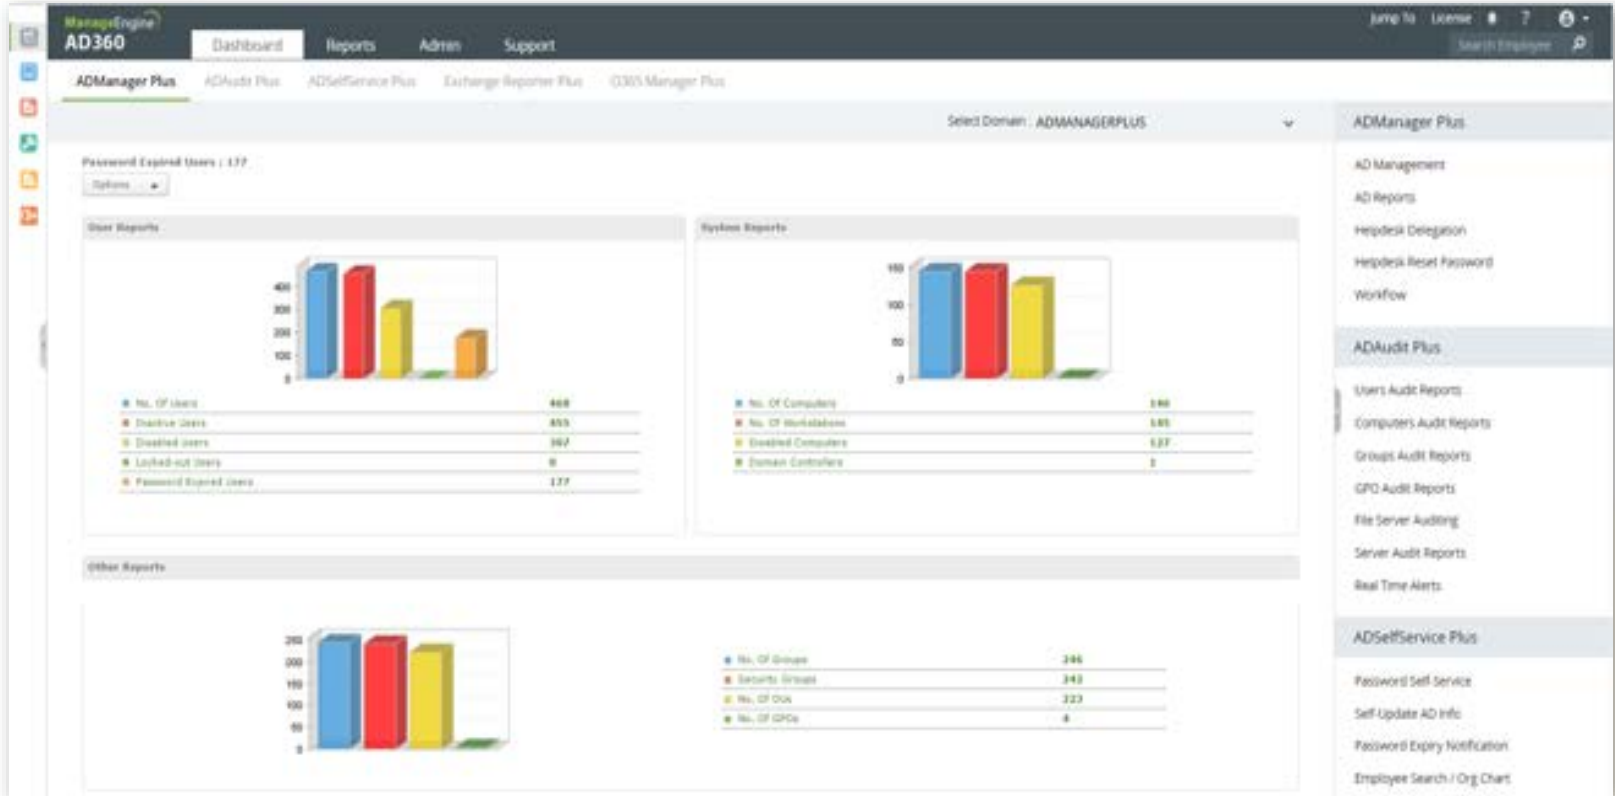

# Why AD360?

---

- Complete AD, Exchange, and Office 365 administration through a single console
- Plug-and-play
- No price difference
- Easily integrate, remove, enable, or disable components

# Consolidated dashboard

# Consolidated reports

The screenshot shows the ManageEngine AD360 interface. The top navigation bar includes 'Dashboard', 'Reports', 'Admin', and 'Support'. The left sidebar lists various report categories, with 'Mailbox Users' selected. The main content area is titled 'Mailboxes' and includes a search bar, a dropdown for 'Office 365 Account' (set to 'zohocorpadingrplus.onmicrosoft.com'), and a 'Generate Now' button. Below the button, it indicates the report was generated on 14 Mar 2017 01:00 AM. A table displays the results with columns for Display Name, Email, Alias, User Principal Name, and Recipient Type. The table contains 7 rows of data.

Display Name	Email	Alias	User Principal Name	Recipient Type
#123	#123@zohocorpadingrplus.onmicrosoft.com	#123	#123@zohocorpadingrplus.onmicrosoft.com	EquipmentMailbox
